FOR IMMEDIATE RELEASE

MasterSpec Small Project—2011 Edition Now Available!

Salt Lake City, UT (June 8 2011)—ARCOM is pleased to announce that the MasterSpec Small Project 2011 Edition is now available.

This upgrade has more to offer than any previous upgrade, including 26 new sections; optional requirements for LEED-NC, LEED-CI, LEED for Homes, and ICC-700; specification coordination checklists; 16 Division 00 documents; and access to SpecAgent—the most complete manufacturer and product resource in the industry.

MasterSpec Small Project is an abridged specification resource for projects limited in size, scope, and duration. It contains over 230 abridged MasterSpec building specification sections from both the architectural and engineering libraries, including mechanical and electrical sections.

About ARCOM

ARCOM offers master guide specifications to engineers, architects, landscape architects, and design professionals in full-length, short form, small project, and outline formats. Recognized as the industry standard, MasterSpec is the most widely used specification system in the U.S., with extensive background research.

ARCOM develops SpecWare® and SpecAgent®. SpecWare is a family of specification productivity software tools that dramatically simplifies specification creation and use. SpecAgent is a web-based tool designed to work with MasterSpec, streamlining the process of building product research and manufacturer selection.

ARCOM is a Salt Lake City-based firm with an additional office in Alexandria, Virginia. The company employs more than 40 full-time specification development professionals: researchers, specification writers and editors, software developers, technical support staff, and customer service professionals.
